|              |   |
|--------------|---|
| Project Name | : IEM –Integrated Expense Management System.  |
| Duration     | : Current   |
| Location     | : Chennai   |
| Role         | : Developer   |
| Environment  | : DOTNET 4.5.1,<br>ASP.NET MVC with C# , SQL SERVER 2012,Angular Js,<br>KnockOut js |
| Team Size    | : 10  |

**Project Description:** IEM is Integrated Expense Management System.

**Modules :** ASMS, Flexibuy, Flexispend, IFams, EOW.

Expense management refers to the systems deployed by a business to process, pay, and audit employee-initiated expenses. These costs include, but are not limited to, expenses incurred for travel and entertainment. Expense management includes the policies and procedures which govern such spending, as well as the technologies and services utilized to process and analyze the data associated with it.

The organization can significantly reduce transaction costs and improve management control when logging, calculating and processing corporate expenses. Independent research evaluating the use of automated expense management systems has confirmed that the cost of processing an expense claim is reduced as the level of automation increases.

**Responsibilities:**

- Understanding the product and the user requirements and system specification.
- Involved in Day-to-Day enhancement and application support
- Day-to-Day enhancement and support, handling both development and support activities

**Project # 3:**
